***Priority***

Applicant has not complied with one or more conditions for receiving the benefit of an earlier filing date under 35 U.S.C. 120 as follows:

This application does not repeat a substantial portion of prior Application No. 09/829801, filed 4/10/01. Should applicant desire to obtain the benefit of the filing date of the prior application, attention is directed to 35 U.S.C. 120 and 37 CFR 1.78.

***Information Disclosure Statement***

The mentioning of references in the specification (page 6/27) is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

***Drawings***

The drawings are objected to because there are several problems with the depiction of the lid, Figs. 6-8: 608 not shown in Fig. 8; what is "804", which does not appear in Figs. 6,7)?; 606 in Fig. 6 is not the same as in Fig. 8; etc. Consequently, the drawing changes of 9/9/05 are not acceptable. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be

Art Unit: 3634

labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 112***

Claims 3-5 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The attachment of lid sections has not been adequately disclosed. See the discussion of the drawings, above. The L-shaped brackets and their location, purpose, etc., is not adequately disclosed.

Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 3634

The scope of the claims is not clear. In claim 1, it is not clear if the opening and closing system is being recited in combination with the swimming pool and the lid and compartment. Initially, the "system" is recited "for" the "lid of a compartment disposed underwater in a swimming pool". However, the power pack is said to be in a "remote position" in relation to the pool, and the linkage is "extending" between the drive and the lid and compartment, both of which suggests that the combination of the lid, compartment and pool are being recited. These claims have been examined as if the combination is being recited.

The same is true of claim 2. Also, paragraph b) of claim 1 is not understood as it appears to be grammatically incorrect.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 4 and 5 are rejected under 35 U.S.C. 102(a) as being clearly anticipated by Conterno.

The panels have lips 15,16, defining an inverted pan, coupling mechanism 13, and torsion structural members and buoyancy "tanks" between walls 14. The term "pivoting edge" establishes no structure that requires pivoting. Only a structural "pan" has been claimed, to which a hinge could be attached. Conterno meets the structure of the recited "pan".

***Allowable Subject Matter***

Claims 1-3 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

***Response to Arguments***

Applicant's arguments have been fully considered but they are not persuasive.

Applicant has not addressed the 112 rejections.

Drawing objections still exist.

The listing of prior art in the specification is not a proper IDS, as discussed above. A form 1449 must be submitted to ensure consideration of these references.

The priority claim is still not in conformance with PTO requirements. Please carefully note the objection above.

Regarding the art rejection, see the above comments concerning the interpretation of Conterno.

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 3634

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
